### **REASONS FOR ALLOWANCE**

1. Claims 1-15 and 32-33 are allowed. The following is an examiner's statement of reasons for allowance: The closest prior art is U.S. Patent Application Publication Nos. 2004/0122397 to Morman et al., 2003/0230378 to Olsson et al., 2002/0151864 to Otsubo et al., and 2002/0151860 to Klemp et al., and U.S. Patent Nos. 5,451,442 to Pieniak and 5,062,840 to Holt et al. Morman teaches many of the claim limitations, including a cutout, material from the cutout being removed from the web, and the crotch member including an elastic material. Applicant's arguments filed April 22, 2009 are convincing that Morman does not teach the crotch member covering an entirety of the cutout, which overcomes rejections under 35 USC 102(e). Applicant's statement of common ownership is sufficient to remove Morman as prior art under 35 USC 103(a), pursuant to 35 USC 103(c). For Claim 5, Morman does not teach the cutout having a substantially oval shape. For Claim 14, Morman does not teach connecting the crotch member to the front and rear body panel webs when in the stretched condition. For Claim 32, Morman does not teach cutting the web of body panel material being performed separately from and after forming the cutout in the web.

2. Olsson teaches claim limitations, including a crotch member covering the entirety of a cutout. Olsson teaches the crotch member including an elastic material. Olsson teaches a substantially oval-shaped cutout. However, Olsson does not teach that the removed portion of the body panel material does not form any part of the front panel web; Olsson teaches away from this feature.

3. Otsubo teaches most of the claim limitations, including a cutout. Otsubo teaches the crotch member including an elastic material. Otsubo does not teach the material from the cutout being removed from the web, nor the crotch member covering the entirety of the cutout. Otsubo does not teach the cutout being substantially oval-shaped.
4. Klemp teaches a disposable undergarment having cutouts entirely covered by a crotch member. The Klemp cutouts have a substantially oval shape. Klemp does not teach the cutouts being formed by removing material from the web, or most of the other limitations.
5. Pieniak teaches removal of material from a web. Pieniak does not teach a cutout, or most of the other limitations.
6. Holt teaches a cutout having a substantially oval shape, but does not teach the other claim limitations.
7. Motivation to combine the various references is lacking. In addition, combining the various references would not produce the complete invention as claimed.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
